Strengthen your ability to identify, manage, and reduce cyber risk across modern supply chains in this practical, management level course focused on third party risk, vendor security and operational resilience.

This National Cybersecurity Preparedness Consortium (NCPC) training course is developed and delivered by the Texas A&M Engineering Extension Service/ National Emergency Response and Recovery Training Center (TEEX/NERRTC).

Course Description

This management level course provides participants with a clear, technically informed understanding of how cyber risks impact modern supply chains and the tactics threat actors use to exploit vendors, suppliers and interconnected systems. Through discussions, real world case studies and applied scenarios, participants will explore common supply chain vulnerabilities and the methods used to introduce cyber risk across procurement, logistics, warehousing and information systems.

The course introduces practical frameworks for mapping supply chain dependencies, assessing third party risk, and aligning protections with standards such as the NIST Cybersecurity Framework for Supply Chains. Participants will learn actionable strategies to strengthen vendor oversight, improve cyber resilience and respond effectively to supply chain incidents.

At the end of the course, participants will be able to:

- Identify cybersecurity risks across the supply chain ecosystem;
- Assess third party and vendor security posture; and
- Apply strategies to mitigate and respond to supply chain cyber threats.

Target Audience

Federal, state, local, regional, tribal, and territorial government officials; supply chain, procurement, and logistics leaders; cybersecurity and risk professionals; business managers; and personnel responsible for vendor management, sourcing, warehousing, transportation, or supply chain security who have an interest in strengthening cybersecurity within their supply chains.

Required

There are no prerequisites for this course.

Enrollment Requirements

U.S. citizen with a FEMA Student ID. A FEMA SID can be obtained at **https://cdp.dhs.gov/femasid** or with TEEX assistance upon arrival for class.
