

AWR 389

Community Lifelines, Logistics & Supply Chain Awareness

Course Description

Global, national, and local disruptions are becoming increasingly unpredictable and have complex, cascading effects as the systems they affect are interconnected.

FEMA's Community Lifelines approach focuses on logistical preparations to restore the key services that keep a community running. This program offers a practical and agile approach to managing supply chain disruptions while building stakeholder partnerships.

Learn how to meld FEMA's Community Lifelines with Supply Chain & Logistics techniques to keep supply chains running to expedite recovery.

Audience

This course is intended for community stakeholders who may have an Emergency Operations Center role and would potentially help resolve any "Lifeline" disruption.

Prerequisites

Required: Completion of AWR392-W by May 30th, 2023.

Register for this course here: www.frederick.edu/CommunityLifelines

Course Tuition

- No tuition fee
- Travel costs may be grant eligible for local responder agencies. Contact your respective county/tribal emergency manager.
