

FEMA P-154, *Rapid Visual Screening of Buildings for Potential Seismic Hazards* (pre-disaster)

The FEMA P-154 web-based training instructs on rapidly identifying and screening buildings for potential seismic hazards, enabling local officials to prioritize safety and emergency-response plans. This training, based on the 2015 third edition, includes significant enhancements from the previous edition.

2024

COURSE OBJECTIVES

Upon completion of this course, students will be able to:

- Rapidly identify, inventory, and screen local buildings according to their expected safety and usability during and after earthquakes.
- Plan and prioritize further engineering and vulnerability analysis, emergency-response needs, and mitigation projects.

This web-based training is supported by National Earthquake Hazards Reduction Program (NEHRP) National Earthquake Technical Assistance Program (NETAP). For more information about NETAP, [click here](#).

AUDIENCE

This course is intended for building officials, engineers, architects, building owners, emergency managers, risk analysts, and other interested citizens and volunteers.

MATERIALS

- FEMA P-154 report, Rapid Visual Screening of Buildings for Potential Seismic Hazards, Third Edition ([download virtual PDF](#))
- FEMA P-155 report, Rapid Visual Screening of Buildings for Potential Seismic Hazards: Supporting Documentation, Third Edition ([download virtual PDF](#))

TIME: 1 – 5 p.m. PST

LOCATION: Online

REGISTRATION

Registration is required.
