

FEMA

NETAP Online Training Courses: ATC-20-1, *Post-Earthquake Safety Evaluation of Buildings* and FEMA P-2055, *Post-disaster Building Safety Evaluation Guidance*

Free FEMA-funded National Earthquake Technical Assistance Program (NETAP) Web-Based Trainings. These training courses are scheduled for September 15 and 16 respectively.

Web-Based Training Description

This free training on ATC-20-1, *Procedures for Post-earthquake Safety Evaluation of Buildings*, provides instruction on rapid and detailed evaluation procedures for evaluating earthquake-damaged buildings and posting them as INSPECTED (apparently safe, green placard), LIMITED ENTRY (yellow placard), or UNSAFE (red placard). The web-based training provides examples that allow attendees to evaluate building damage conditions, assess the overall risk from the damage, and recommend which of the three placards should be posted on the building. These evaluations and placards can be used in planning and executing evacuation, re-entry, and rebuilding strategies.

This free training on FEMA P-2055, *Post-disaster Building Safety Evaluation Guidance*, provides an overview of existing procedures for post-disaster building safety evaluations and issues related to structural safety and habitability. Guidance is also presented on planning, managing, and implementing safety evaluation programs before and after a disaster incident. In late 2018, Congress directed FEMA to develop and publish guidance, including best practices, for the post-disaster safety assessment of buildings by licensed architects and engineers to ensure that design professionals properly analyze the structural integrity and livability of buildings and structures following disasters. The final report, FEMA P-2055, covers current state of practice, including recommendations related to structural safety and habitability. This report serves as a comprehensive review of all facets of post-disaster safety evaluations, covering deployment management, secondary hazard events, requirements for health of occupants, and discussions on interim post-disaster use of buildings.

Participants who attend the full duration of the trainings will receive PDH certificates.

Target Audience

The target audience for these web-based trainings includes building officials, engineers, architects, building owners, emergency managers, risk analysts, and other interested citizens and volunteers.

How to Register

Participants may sign up for one or both trainings. Participants are highly encouraged to sign up for both trainings.

This web-based training is supported by National Earthquake Hazards Reduction Program (NEHRP) National Earthquake Technical Assistance Program (NETAP). For more information visit: <https://www.fema.gov/emergency-managers/risk-management/earthquake/training/netap>.

General Information

ATC-20-1

Date & Time: Tuesday, September 15, 2026 (9am – 1pm Pacific; 10am to 2pm Mountain, 12 to 3pm Eastern)

Location: Online (See “How to Register” section above)

Instructor: Ed Huston, Huston Structural Engineering

Materials: ATC-20-1, Field Manual: *Post-earthquake Safety Evaluation of Buildings* (hard copy available free of charge to attendees who complete the request form after the training)

FEMA P-2055

Date & Time: Wednesday, September 16, 2026 (9am - 1pm Pacific; 10am to 2pm Mountain, 12 to 3pm Eastern)

Location: Online (See “How to Register” section above)

Instructor: Ed Huston, Huston Structural Engineering

Materials: FEMA P-2055, Post-disaster Building Safety Evaluation Guidance
