

Tier II Reports can be imported to the Computer-Aided Management of Emergency Operations (CAMEO) program. The program is free and provided by the EPA. Tier II Reports can be imported as Tier2 Submit files or as CAMEO data that has been provided for sharing. Begin by downloading the latest version of CAMEO at:

<http://www.epa.gov/osweroe1/content/cameo/>

The screenshot shows the EPA's CAMEO website. The page title is "Emergency Management" and the main heading is "Computer-Aided Management of Emergency Operations (CAMEO)". A red arrow points to a news flash: "CAMEO/m version 2.4 is released (November 2012)". The website includes a navigation menu on the left, a search bar at the top, and a "CAMEO Quick Links" sidebar on the right. The footer contains links for "EPA Home", "Privacy and Security Notice", and "Contact Us".

### Downloading, Installing, and Running CAMEOfm

#### Download CAMEOfm version 2.4

**Important note for current CAMEOfm users:** Installing a new version of CAMEOfm will overwrite the data in your current version of CAMEOfm. To ensure that your data is successfully transferred to the new version, download and read the [instructions for updating to CAMEOfm 2.4 from a previous version](#).

#### Download the Program Components

Since CAMEOfm 2.0, the traditional CAMEO functionality has been split into two programs that need to be downloaded and installed separately.

- CAMEOfm is a database application where you can keep track of information (such as chemical inventories and contact information for facilities in your community) to assist in emergency response and planning.
- CAMEO Chemicals has an extensive chemical database with critical response information for thousands of chemicals, and a tool that tells you what reactions might occur if chemicals were mixed together. (The downloadable version can share information with other CAMEO suite programs; an [online version](#) (EXIT Disclaimer) is also available.)

[Download CAMEOfm for Windows \(Version 2.4, November 2012, 20MB EXE\)](#) ←

[Download CAMEO Chemicals for Windows \(Version 2.3, August 2012, from the NOAA website](#) (EXIT Disclaimer))

[Download CAMEOfm for the Macintosh \(Version 2.4, November 2012, 44MB DMG\); see instructions for latest Mac OS X versions](#)

[Download CAMEO Chemicals for the Macintosh \(Version 2.3, August 2012, from the NOAA website](#) (EXIT Disclaimer))

**Note:** The installed programs include extensive on-screen help systems (rather than separate manuals).

**CAMEOfm System Requirements:** The Windows version requires Windows XP (Service Pack 3), Windows Vista (Service Pack 2), or Windows 7. (We have performed some limited testing on Windows 8, and there are no known issues at this time.) The Macintosh version requires Leopard (v. 10.5.7 or later), Snow Leopard (10.6.x), Lion (10.7.x), or Mountain Lion (10.8.x).

#### Installing CAMEOfm

**Note:** If you're installing CAMEOfm on a Mac with an operating system version 10.7.5 or higher (that is, newer versions of Lion and all versions of Mountain Lion), make sure to review the [installation instructions for latest Mac OS X versions](#). This document provides guidance on installing CAMEOfm on Macs with Gatekeeper.

#### Existing CAMEOfm users:

Open CAMEO and select “Facilities.”

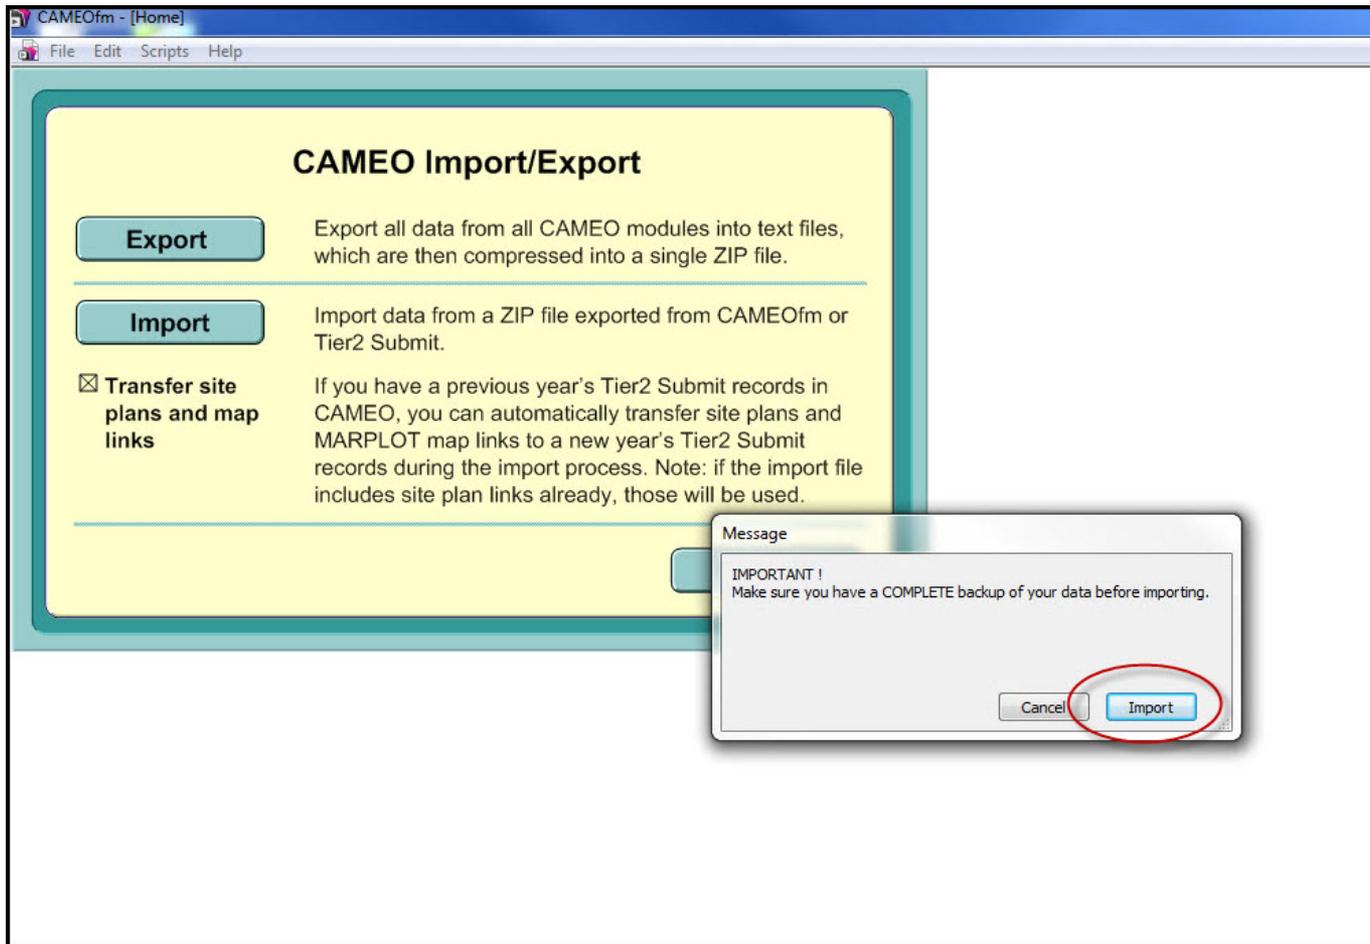

To import Tier II Reports, select the “Import\Export” option from the “File” menu.

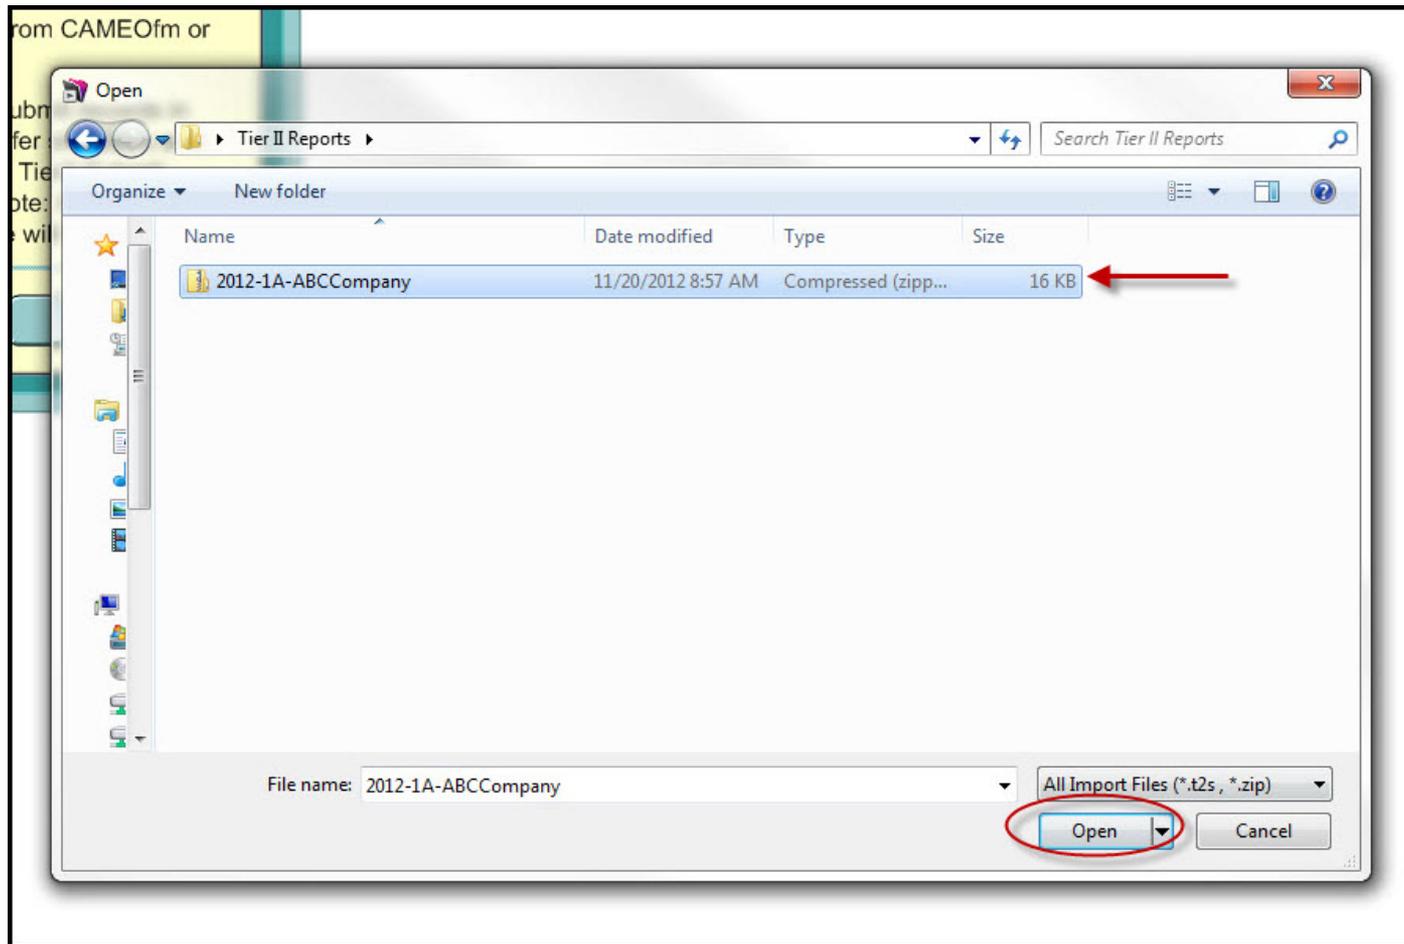

Select "Import." The "Transfer site plans and map links" should remain checked to ensure those records are imported with the data.

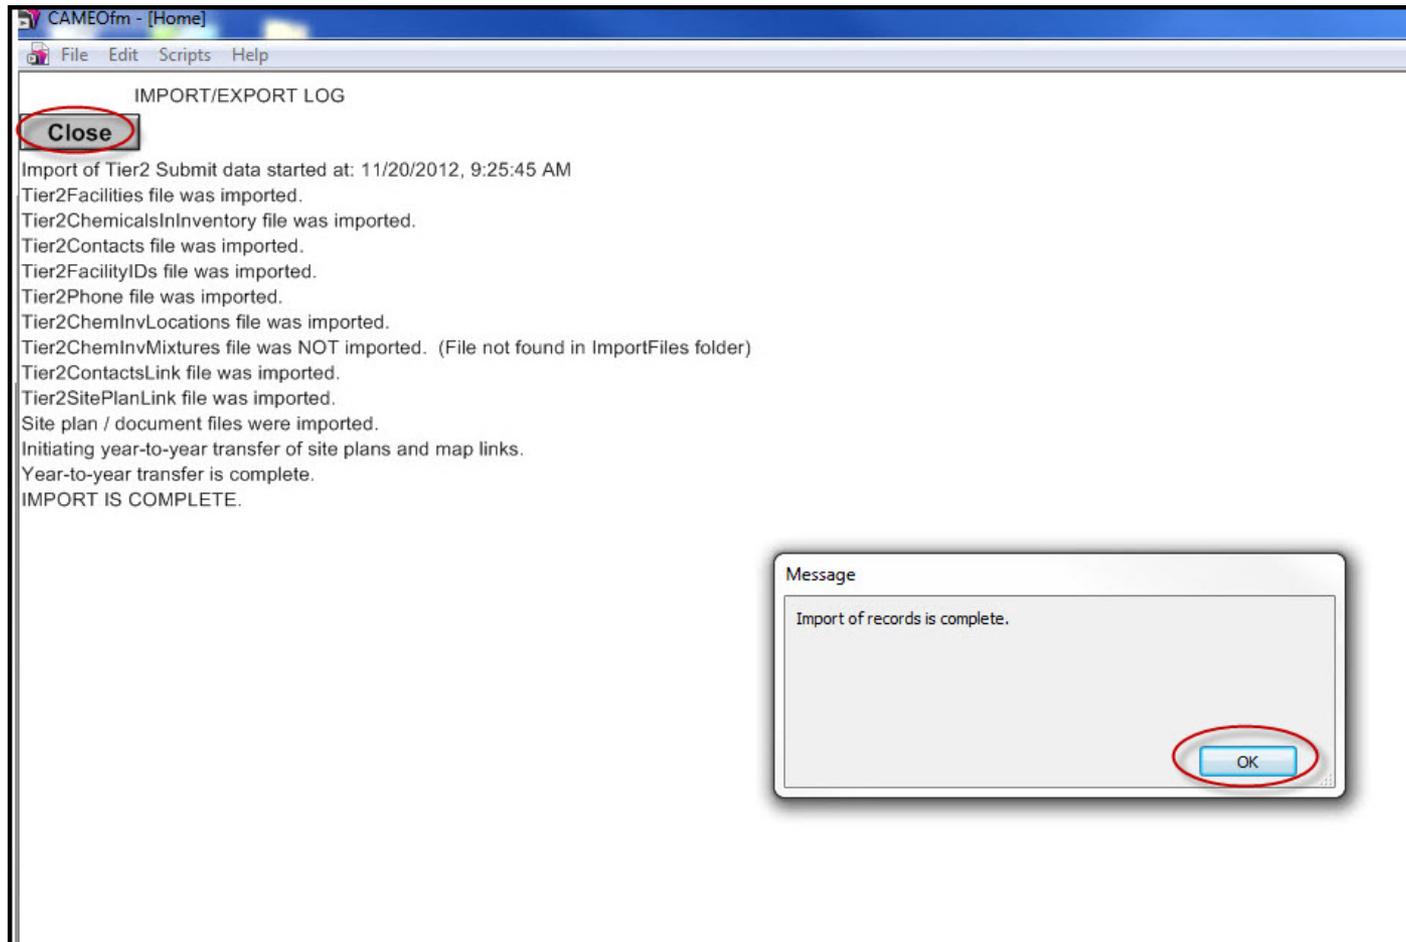

Select "Import" to continue.

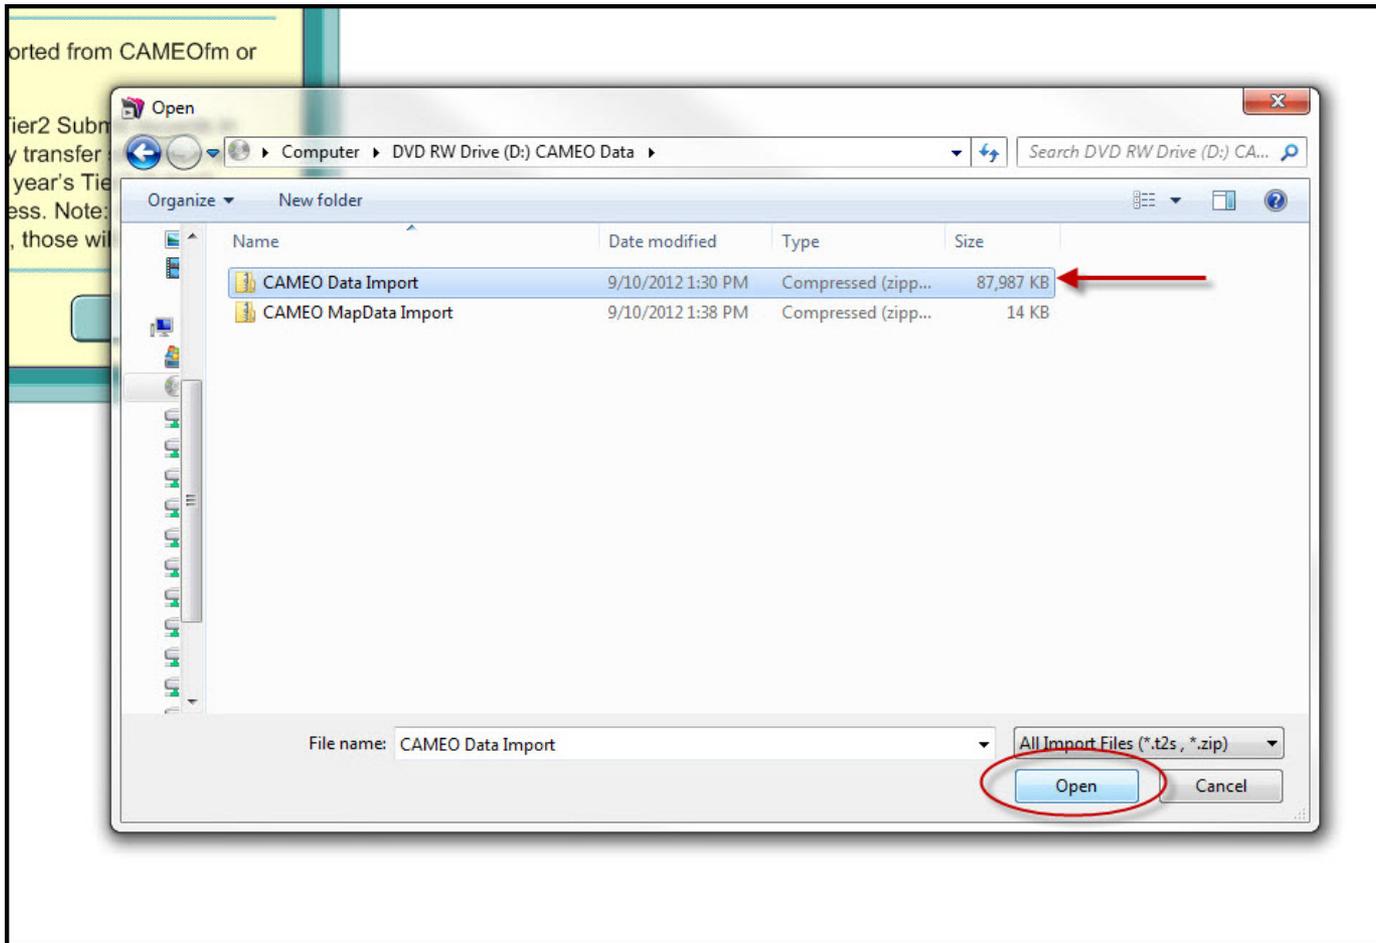

If importing Tier2 Submit files, browse to the file location (in either .t2s or zipped format), highlight and select “Open.”

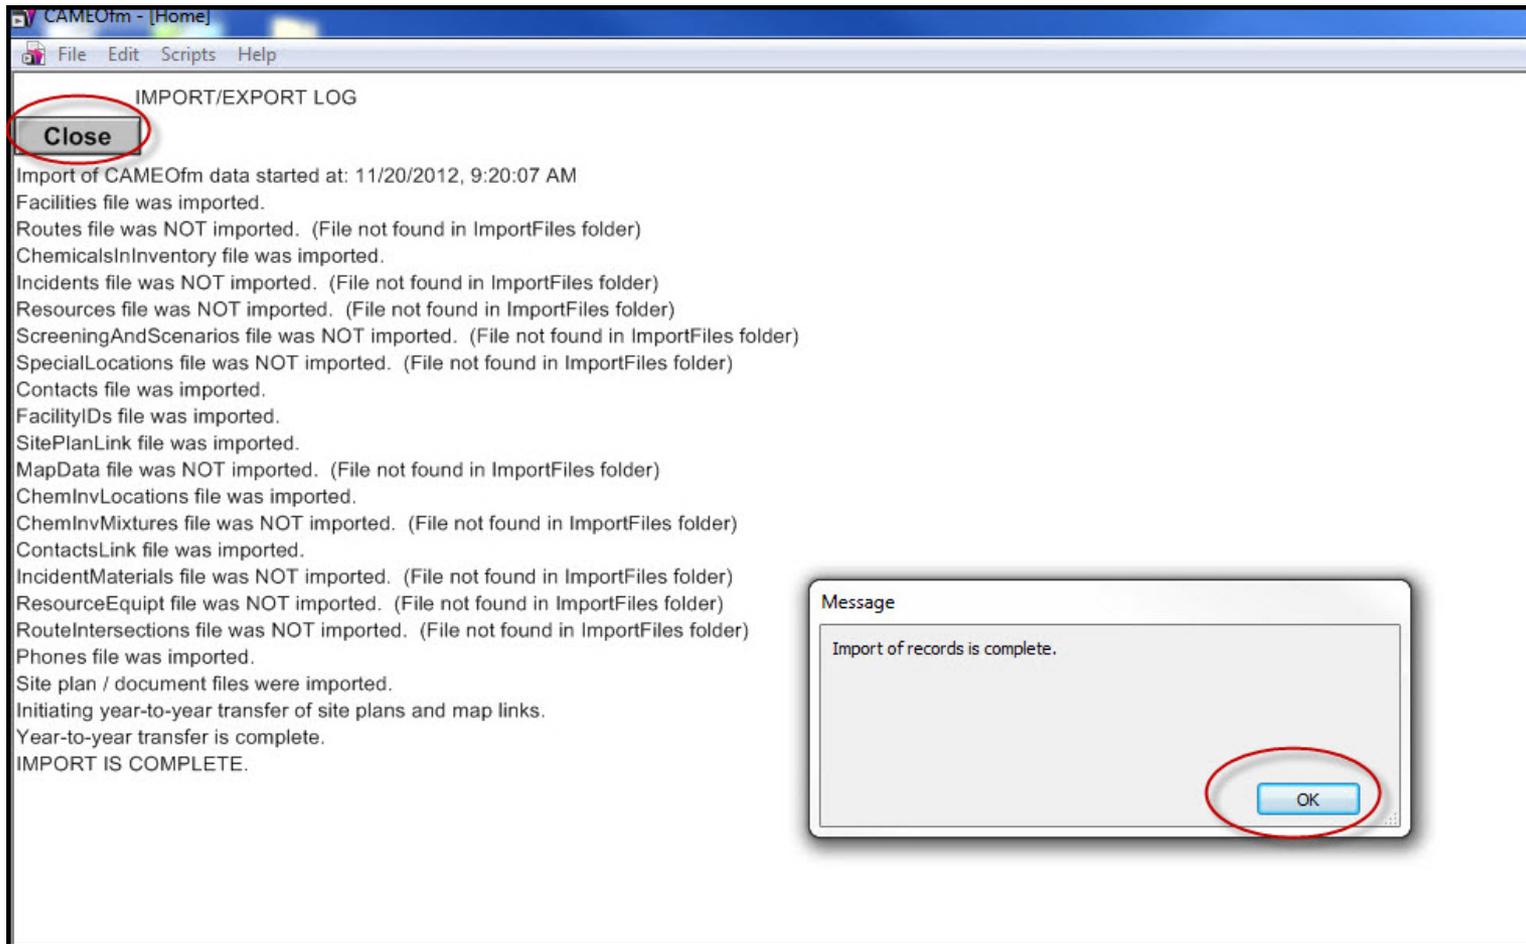

Once the import is complete, choose “OK,” then select “Close.”

If the information is provided as CAMEO Data, choose the CAMEO Data compressed file and select “Open.”

When the import is complete, select “OK,” then choose “Close.”

The Tier II facilities should now be in CAMEO. Open a record by double clicking the facility, or highlight and select “View Record.”

The screenshot shows the CAMEOfm - [Facilities] application window. The menu bar includes File, Edit, Record, Search, Sharing, Scripts, and Help. The navigation bar contains buttons for Home, View Record (circled in red), New Search, Edit, New Record, and Help. A pagination control shows '1 of 1 total'. Below the navigation bar is a yellow header for 'Found Facilities'. Underneath, the text 'Imported records' is displayed. A table with the following columns is shown: Name, Dept, Street Address, City, State, and Zip. The table contains one record: ABC Company, with a red arrow pointing to the Name cell.

Name	Dept	Street Address	City	State	Zip
ABC Company		1234 Any Street	Boise	ID	83709

Use the tabs to review the facility/chemical information associated with that facility.
