Fact Sheet

Presidential Disaster Declaration for February 5-27 Severe Winter Storms and Flooding

- **Public Assistance (PA):** After the severe winter storms and flooding in February, FEMA’s **Public Assistance** program is helping public entities and certain private nonprofit organizations in 11 Idaho counties recover much of their eligible disaster-related costs.
 - PA grants help reimburse applicants for costs to clear disaster-related debris from roadways, emergency measures to keep residents and property safe, and repairs to roads, bridges and other public infrastructure that residents use every day.
- **Hazard Mitigation Grant Program (HMGP):** The disaster declaration also provides for additional grants in Idaho under HMGP.
 - This program provides supplemental financial assistance to state agencies, local and tribal governments and certain private nonprofit organizations to reduce vulnerability to future disasters and promote community resilience.
- **Designated Counties:** Entities affected by the disaster in **Bingham, Cassia, Elmore, Franklin, Gooding, Jefferson, Jerome, Lincoln, Minidoka, Twin Falls and Washington** counties may be eligible to apply for PA and/or HMGP grants.
- **Kickoff Meetings:** Specialists from the Idaho Office of Emergency Management and FEMA are meeting with applicants to provide information on eligible reimbursement costs for specific projects. Specialists also provide information on how to build in a way to prevent or lessen damage in future disasters.
 - FEMA and IOEM are conducting kickoff meetings with each of the 43 applicants who submitted RPAs by the May 22 deadline
- **Project Worksheets:** The next step in the PA process is to summarize and document the eligible damages and expenses on individual project worksheets.
 - Once a project worksheet is reviewed and approved, a grant may be approved for the applicant’s eligible costs.
- Questions about the PA program may be emailed to IOEMRecovery@imd.idaho.gov.
- **To apply for HMGP:** Counties and jurisdictions that have identified projects and adopted mitigation plans are encouraged to review and identify potential hazard mitigation sites in communities and apply for funds under FEMA’s HMGP grant program.

- Examples of these projects include upsizing culverts to prevent clogging; using geosynthetic materials when repairing road sections to prevent washouts, increase durability and decrease annual maintenance costs; elevating roads, bridges and other structures; adopting and developing standards and enforcing building codes.
- Applications are **due to State Hazard Mitigation Officer Susan Cleverley at IOEM by Aug. 25, 2017**. Questions about HMGP may be emailed to Cleverley's office at Mitigation2017@imd.idaho.gov.
- Projects in the designated counties will be considered first. If resources are still available upon completion of the review process, eligible entities throughout the state may apply.
- **Funding:** FEMA reimburses applicants for at least 75 percent of their eligible expenses for PA and HMGP, while the other 25 percent is the nonfederal share. The federal portion is paid directly to the state, which then makes disbursements to the local and tribal jurisdictions and organizations that incurred costs.

The Idaho Office of Emergency Management is a Division of the Idaho Military Division. The services we provide are to facilitate emergency management in Idaho, and to assist neighboring states. The men and women of this Division are dedicated to their mission of protecting the lives and property of the people of Idaho, as well as preserving the environmental and the economic health of Idaho.

FEMA's mission is to support our citizens and first responders to ensure that as a nation we work together to build, sustain, and improve our capability to prepare for, protect against, respond to, recover from, and mitigate all hazards.
