INSTRUCTIONS

TIER II INVENTORY FORM

Submission of this Tier II form (when requested) is required under section 312 of the Emergency Planning and Community Right-to-Know Act (EPCRA) which was enacted as Title III of the Superfund Amendments and Reauthorization Act of 1986, Public Law 99-499, 42 U.S.C. Section 11022.

The purpose of this Tier II form is to provide State and local officials and the public with specific information on hazardous chemicals present at your facility during the past year.

CERTIFICATION
The owner or operator or the officially designated representative of the owner or operator must certify that all information included in the Tier II submission is true, accurate, and complete. On the first page of the Tier II report, enter your full name and official title. Sign your name and enter the current date. Also, enter the total number of pages included in the Confidential and Non-Confidential Information Sheet as well as all attachments. An original signature is required on at least the first page of the submission. Subsequent pages must contain either an original signature, or a signature stamp. Note: Check with your State for specific requirements for the submission and certification.

YOU MUST PROVIDE ALL THE INFORMATION REQUESTED ON THIS FORM TO FULFILL TIER II REPORTING REQUIREMENTS.
This form may also be used as a worksheet for completing the Tier I form or may be submitted in place of the Tier I form. Your State may have specific requirements.

WHO MUST SUBMIT THIS FORM
Section 312 of EPCRA requires that the owner or operator of a facility submit their Tier II form if so requested by a State emergency response commission, a local emergency planning committee, or local fire department with jurisdiction over the facility.

This request may apply to the owner or operator of any facility that is required under regulations implementing the Occupational Safety and Health Act of 1970, to prepare or have available a Material Safety Data Sheet (MSDS) for a hazardous chemical present at the facility. MSDS requirements are specified in the Occupational Safety and Health Administration (OSHA) Hazard Communication Standard (HCS), found in Title 29 of the Code of Federal Regulations (CFR) at Section1910.1200.

This form does not have to be submitted if all of the chemicals located at your facility are excluded under Section 311(e) of EPCRA (discussed below).

WHAT CHEMICALS ARE INCLUDED
If you are submitting the Tier II form in lieu of Tier I, you must report the required information on this Tier II form for each hazardous chemical present at your facility in quantities equal to or greater than established threshold amounts (discussed below), unless the chemicals are excluded under Section 311(e) of EPCRA.

Hazardous chemical means any hazardous chemical as defined under 29 CFR 1910.1200(c) except that such term does not include substances excluded from section 311(e), as discussed below.

If you elect to submit Tier I rather than Tier II, you may still be required to submit Tier II information upon request.
**WHAT CHEMICALS ARE EXCLUDED**
Section 311(e) of EPCRA excludes the following substances:

1) Any food, food additive, color additive, drug, or cosmetic regulated by the Food and Drug Administration;

2) Any substance present as a solid in any manufactured item to the extent exposure to the substance does not occur under normal conditions of use;

3) Any substance to the extent it is used for personal, family, or household purposes, or is present in the same form and concentration as a product packaged for distribution and use by the general public;

4) Any substance to the extent it is used in a research laboratory or a hospital or other medical facility under the direct supervision of a technically qualified individual; and

5) Any substance to the extent it is used in routine agricultural operations or is a fertilizer held for sale by a retailer to the ultimate customer.

OSHA regulations, Section 1910.1200(b), stipulate exemptions from the requirement to prepare to have available an MSDS.

**REPORTING THRESHOLDS**
Minimum thresholds have been established for Tier I/Tier II reporting in 40 CFR part 370). These thresholds are as follows:

For Extremely Hazardous Substances (EHSs) designated under EPCRA Section 302 the reporting threshold is 500 pounds (or 227 kg.) or the threshold planning quantity (TPQ), whichever is lower. (EHSs and their TPQs are listed in 40 CFR part 355, Appendix A and B.

For gasoline (all grades combined) at a retail gas station, the threshold level is 75,000 gallons (or approximately 283,900 liters), if the tank(s) was stored entirely underground and was in compliance at all times during the preceding calendar year with all applicable Underground Storage Tank (UST) requirements at 40 CFR part 280 or requirements of the State UST program approved by the Agency under 40 CFR part 281.

For diesel fuel (all grades combined) at a retail gas station, the threshold level is 100,000 gallons (or approximately 378,500 liters), if the tank(s) was stored entirely underground and the tank(s) was in compliance at all times during the preceding calendar year with all applicable Underground Storage Tank (UST) requirements at 40 CFR part 280 or requirements of the State UST program approved by the Agency under 40 CFR part 281.

*Note: A retail gas station means a retail facility engaged in selling gasoline and/or diesel fuel principally to the public for motor vehicle use on land.*

For all other hazardous chemicals for which facilities are required to have or prepare an MSDS, the minimum reporting threshold is 10,000 pounds (or 4,540 kg.).

You need to report hazardous chemicals that were present at your facility at any time during the previous calendar year at levels that equal or exceed these thresholds. For instructions on threshold determinations for components of mixtures, see “What About Mixtures?” in this document.

*Note: States may have lower reporting thresholds and additional chemicals covered by the state right-to-know regulations. Contact your state for any specific requirements for that state.*
WHEN TO SUBMIT THIS FORM
Owners or operators of facilities that have hazardous chemicals present at the facility in quantities equal to or greater than set threshold levels must submit either Tier I or Tier II form by March 1.

Note: All states currently require facilities to submit federal Tier II inventory form or the state developed form or format including on-line reporting and certification. Contact your state for the specific requirements for that state.

WHERE TO SUBMIT THIS FORM
Send the completed Tier II form(s) to each of the following organizations:

1) Your State Emergency Response Commission or Emergency Response Commission of the Tribe.
2) Your Local Emergency Planning Committee.
3) The fire department with jurisdiction over your facility.

CONFIDENTIAL INFORMATION
Under EPCRA Section 324, you may elect to withhold location information on a specific chemical from disclosure to the public. If you choose to do so, check the box marked “yes”.

- On a separate Tier II Confidential Location Information Sheet, enter the name and CAS number of each chemical for which you are keeping the location confidential.
- Enter the appropriate location and storage information, as described above for non-confidential locations.
- Attach the Tier II Confidential Location Information Sheet to the Tier II form. This separates confidential locations from other information that will be disclosed to the public.
INSTRUCTIONS TO PAGE ONE OF THE
TIER II INVENTORY FORM

Please read these instructions carefully. Print or type all responses.

REPORTING PERIOD
Enter the appropriate calendar year, beginning January 1 and ending December 31.

IDENTICAL INFORMATION
Check the box located at the top of page one of the form, if the information reported on page one is identical to that submitted last year.

Note: This data element may be only applicable starting reporting year 2014 since most of the information required on page one of the form is new for reporting year 2013.

Chemical descriptions, hazards, amounts, and locations must be provided in this year’s form, even if the information is identical to that submitted last year.

FACILITY IDENTIFICATION
Enter the complete name and address of the location of your facility where the hazardous chemicals are stored. Enter the full street address or state road, county, city, state, and zip code.

Provide a general phone number for your facility. (Note: This is an optional data element.)

Provide the latitude and longitude for the location of your facility.

Indicate if the facility is manned or unmanned. If the facility is manned at least part of the day, check the box “manned”. The box “unmanned” should only be checked if the facility is never manned. This information is useful for state and local emergency planners to include people at your facility in the emergency response plan and for planning evacuation during an emergency.

Estimate the maximum number of occupants that may be present at any one time at your facility. If the facility is manned at least part of a day, indicate the number of persons present. This information is useful for state and local emergency planners and responders in the emergency plan and for planning evacuation during an emergency. You should include contractors, vendors and people that may be present for any training or other events as well as employees. If the location is never manned, check the box marked “N/A”.

Enter the primary North American Industry Classification System (NAICS) code and the Dun & Bradstreet number of your facility. The financial officer of your facility should be able to provide the Dun & Bradstreet number. If your firm does not have this information, contact the State or regional office of Dun & Bradstreet to obtain your facility number or have one assigned.

SUBJECT TO EMERGENCY PLANNING
Indicate if your facility is subject to the emergency planning notification requirement under EPCRA section 302, codified in 40 CFR part 355. Check the box “yes” or “no”.

Page 4 of 11
SUBJECT TO CHEMICAL ACCIDENT PREVENTION
Indicate if your facility is subject to chemical accident prevention provisions under section 112(r) of the Clean Air Act, also known as the Risk Management Program (RMP), codified in 40 CFR part 68. Check the box “yes” or “no”.

IDENTIFICATION NUMBER UNDER THE TOXIC RELEASE INVENTORY (TRI) PROGRAM
If your facility is subject to the Toxic Release Inventory (TRI) program under section 313 of EPCRA, provide the identification number assigned by EPA. If your facility is not subject to this reporting requirement or if your facility has not been assigned a number under this program, check the box marked “N/A”.

IDENTIFICATION NUMBER UNDER THE RISK MANAGEMENT PROGRAM (RMP)
If your facility is subject to the chemical accident prevention provisions codified in 40 CFR part 68, also known as the Risk Management Program, provide the RMP facility identification number assigned by EPA. If your facility is not subject to this provision or if your facility has not been assigned a number, check the box marked “N/A”.

OWNER/OPERATOR
Enter the owner or operator's full name, mailing address, and phone number. Provide the email address of the owner or operator of the facility.

PARENT COMPANY
Enter the name, mailing address, phone number, email address and Dun & Bradstreet number of the parent company. Note: These are optional data elements.

FACILITY EMERGENCY COORDINATOR
Enter the name, title, email address, phone number and 24-hour phone number of the facility emergency coordinator.

Note: This data element is only applicable to facilities subject to EPCRA section 302(c) emergency planning notification. Section 303(d)(1) of EPCRA requires facilities subject to the emergency planning notification requirement under Section 302(c) to designate a facility representative who will participate in the local emergency planning process as a facility emergency coordinator. This data element is also applicable to additional facilities designated by the Governor or the SERC under EPCRA section 302(b)(2)). EPA encourages facilities not subject to the emergency planning notification requirement also to provide this information, for effective emergency planning in your community.

TIER II INFORMATION CONTACT
Enter the name, title, email address and phone number of the person knowledgeable of the information contained in the Tier II inventory form.

EMERGENCY CONTACT
Enter the name, title, phone number and email address of at least one local person or office that can act as a referral if emergency responders need assistance in responding to a chemical accident at the facility. If there is more than one person assigned to this duty, provide the same information for that person.
Also, provide an emergency phone number where such emergency information will be available 24 hours a day, every day. This is mandatory. The facility must make some arrangement to ensure that a 24-hour contact is available.

**INSTRUCTIONS TO PAGE TWO OF THE FORM**

**CHEMICAL INFORMATION SECTION**

**Description, Hazards, Amounts, and Locations**

This section of the Tier II form requires facilities to report specific information on amounts and locations of hazardous chemicals. Separate fields are provided for reporting both pure chemicals and mixtures. For each entry, check the box indicating if the information is identical to the information submitted last year.

Chemical descriptions, hazards, amounts, and locations must be provided even if the information is identical to that submitted last year.

- **What units should I use?**
  
  Calculate all amounts as *weight in pounds*. To convert gas or liquid volume to weight in pounds, multiply by an appropriate density factor.

- **What about mixtures?**

  If a hazardous chemical is part of a mixture, you have the option of reporting the entire mixture or only the portion of the mixture that is a particular hazardous chemical (e.g., If a hazardous solution weighs 100 lbs. but is composed of only 5% of a particular hazardous chemical, you can indicate either 100 lbs. of the mixture or 5 lbs. of the chemical).

  The option used for each mixture at your facility must be consistent with the option used in your Section 311 reporting.

  Because EHSs are important to local emergency planning requirement under EPCRA section 303, EHSs have lower reporting thresholds under EPCRA section 312. The amount of an EHS at a facility (both pure EHSs and EHSs in mixtures) must be aggregated for purposes of threshold determination. It is suggested that the aggregation calculation be done as a first step in determining whether reporting threshold has been met or exceeded. Once you determine whether a threshold for an EHS has been reached, you may report the mixture or product name as it appears on the MSDS. You must also report any EHSs present in the mixture. You do not need to report any non-EHSs in the mixture, but may if you wish to do so. Although you have an option to report either the mixture or the EHS, as provided in 40 CFR 370.14, you must be consistent with your EPCRA section 311 reporting.

  For any mixture containing an EHS that the facility is reporting as a mixture, the facility must check the box “yes” to indicate that the mixture contains an above-threshold EHS. You must also write the name of the EHS(s) contained in the mixture on the line provided.

  You are not required to list any non-EHSs in the mixture. This is optional.
CHEMICAL DESCRIPTION

Separate fields are provided for reporting pure chemicals and mixtures. For each entry, check the box indicating if the information is identical to the information submitted last year.

To report mixtures, facilities have the option to report by the component or the mixture itself. However, as stated in the regulations at 40 CFR 370.14(b), the reporting option used must be consistent for both MSDS and inventory reporting, unless it is not possible to do so. This means that, if the facility report on a specific mixture as a whole for MSDS reporting, then the facility must report on that mixture as a whole for inventory reporting too.

Pure Chemical:
- Provide the chemical name (or common name of the chemical) as provided on the Material Safety Data Sheet (MSDS). Enter the Chemical Abstract Service (CAS) registry number.
- Indicate if the chemical is an EHS. Check the box “yes” or “no”.
- Check box for the appropriate descriptor for the chemical: solid, liquid, or gas.

Mixture:
- Provide the name of the mixture, product name or trade name as provided on the material safety data sheet (MSDS).
- Enter the Chemical Abstract Service (CAS) number of the mixture or product, if available.
- Check box for the appropriate descriptor: solid, liquid, or gas.
- If the mixture contains any EHS, check the box “yes”, and then enter the name and CAS number of each EHS in the mixture.
- You are not required to list non-EHSs in the mixture, but may report if you wish to do so.

If you are withholding the name of a chemical or mixture as trade secret in accordance with criteria specified in EPCRA section 322, enter the generic class or category that is structurally descriptive of the chemical (e.g., list toluene diisocyanate as organic isocyanate) and check the box marked Trade Secret. Trade secret information should be submitted to EPA and must include a substantiation.

Trade secret regulations can be found in 40 CFR part 350.

Trade secret substantiation form and instructions can be accessed from EPA website at www.epa.gov/emergencies/content/epcra/tier2.htm#inst.

PHYSICAL AND HEALTH HAZARDS

For each chemical you have listed, check all the physical and health hazard boxes that apply. These hazard categories are defined in 40 CFR 370.66. The two health hazard categories and three physical hazard categories are a consolidation of the 23 hazard categories defined in the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Hazard Category Comparison For Reporting Under Sections 311 and 312
EPA’s Hazard Categories

OSHA’s Hazard Categories

Fire Hazard
- Flammable
- Combustion Liquid
- Pyrophoric
- Oxidizer

Sudden Release of Pressure
- Explosive
- Compressed Gas

Reactive
- Unstable Reactive
- Organic Peroxide
- Water Reactive

Immediate (Acute) Health Hazards
- Highly Toxic
- Toxic
- Irritant
- Sensitizer
- Corrosive

- Other hazardous chemicals with an adverse effect with short term exposure

Delayed (Chronic) Health Hazard
- Carcinogens

- Other hazardous chemicals with an adverse effect with long term exposure

**MAXIMUM AMOUNT**

1) For each pure chemical or mixture that you are reporting, estimate the maximum amount present at your facility on any single day during the reporting period.

2) If you are reporting a mixture, you must list any EHS(s) present in the mixture and report the maximum amount and the CAS number(s) of each EHS present in the mixture. Find the appropriate range value code in Table I.

3) Enter this range value as the maximum daily amount.

**TABLE I - REPORTING RANGES**

<table>
<thead>
<tr>
<th>Range Value</th>
<th>Weight Range in Pounds</th>
</tr>
</thead>
<tbody>
<tr>
<td>01</td>
<td>From 0 To 99</td>
</tr>
<tr>
<td>02</td>
<td>From 100 To 499</td>
</tr>
<tr>
<td>03</td>
<td>From 500 To 999</td>
</tr>
<tr>
<td>04</td>
<td>From 1,000 To 4,999</td>
</tr>
<tr>
<td>05</td>
<td>From 5,000 To 9,999</td>
</tr>
<tr>
<td>06</td>
<td>From 10,000 To 24,999</td>
</tr>
<tr>
<td>07</td>
<td>From 25,000 To 49,999</td>
</tr>
<tr>
<td>08</td>
<td>From 50,000 To 74,999</td>
</tr>
</tbody>
</table>
EXAMPLE:
You received one large shipment of a solvent mixture last year. The shipment filled five 5,000-gallon storage tanks. You know that the solvent contains 10% benzene, which is a hazardous chemical.

You figure that 10% of 25,000 gallons is 2,500 gallons. You also know that the density of benzene is 7.29 pounds per gallon, so you multiply 2,500 gallons by 7.29 pounds per gallon to get a weight of 18,225 pounds.

Then you look at Table I and find that the range value 06 corresponds to 18,225. You enter 06 as the Maximum Amount.

AVERAGE DAILY AMOUNT
1) For each pure chemical or mixture that you are reporting, estimate the average weight in pounds that was present at your facility during the year.
2) To do this, total all daily weights and divide by the number of days the chemical was present on the site.
3) Find the appropriate range value in Table I.
4) Enter this range value as the Average Daily Amount.

EXAMPLE:
The 25,000-gallon shipment of solvent you received last year was gradually used up and completely gone in 315 days. The sum of the daily volume levels in the tank is 4,536,000 gallons. By dividing 4,536,000 gallons by 315 days on-site, you calculate an average daily amount of 14,400 gallons.

You already know that the solvent contains 10% benzene, which is a hazardous chemical. Since 10% of 14,400 is 1,440, you figure that you had an average of 1,440 gallons of benzene. You also know that the density of benzene is 7.29 pounds per gallon, so you multiply 1,440 by 7.29 to get a weight of 10,500 pounds.

Then you look at Table I and find that the range value 06 corresponds to 10,500. You enter 06 as the Average Daily Amount.

NUMBER OF DAYS ON-SITE
Enter the number of days that the hazardous chemical was present on-site.

EXAMPLE:
The solvent composed of 10% benzene was present for 315 days at your facility. Enter 315 in the space provided.

STORAGE TYPES, CONDITIONS AND LOCATIONS
List all non-confidential locations of hazardous chemicals along with storage types and conditions associated with each location. Please note that a particular chemical or mixture may be located in several places around the facility.
1. **STORAGE TYPES AND CONDITIONS**
Enter the types and conditions of storage for each chemical that you are reporting.

   a. *Table II.* This table lists examples of some of the common storage types that facilities use at their site. You may provide a detailed description for the storage type at your facility.

   b. *Table III.* For each location, find the appropriate storage types for pressure and temperature conditions. You may provide a description for the various conditions at your facility.

<table>

</tbody>
</table>

2. **STORAGE LOCATIONS:**
Indicate if your facility wish to claim the location information for any of the pure chemical or mixture that you are reporting. Check the box “yes” or “no”.

If you wish to claim the location information confidential for any of the chemical or mixture that you are reporting, you must fill out the Confidential Location Information Sheet and you must submit it along with your Tier II inventory form. The Confidential Location Information Sheet can be found at EPA’s website at [www.epa.gov/emergencies/content/epcra/tier2.htm#inst](http://www.epa.gov/emergencies/content/epcra/tier2.htm#inst).

If the location is non-confidential, provide a brief description of the precise location of the chemical, so that emergency responders can locate the area easily. You may find it advantageous to provide the optional site plan or site coordinates as explained below.

For each chemical, indicate at a minimum the building or lot. Additionally, where practical, the room or area may be indicated. You may respond in narrative form with appropriate site coordinates or abbreviations.

If the chemical is present in more than one building, lot, or area location, list each location as appropriate.
OPTIONAL ATTACHMENTS
If you choose to attach one of the following, check the appropriate optional attachments box at the bottom of the chemical reporting section of the Tier II form.

a. *A site plan* with site coordinates indicated for buildings, lots, areas, etc. throughout your facility.
b. *A list of site coordinate abbreviations* that correspond to buildings, lots, areas, etc. throughout your facility.
c. *A description of dikes and other safeguard measures* for storage locations throughout your facility.

**EXAMPLE:**
You may have benzene in the main room of the main building, and in tank 2 in tank field 10. You may attach a site plan with coordinates as follows: main building = G-2, tank field 10 = B-6. Fill in the Storage Location as follows:

B-6 [ Tank 2 ] G-2 [Main Room]

ADDITIONAL REPORTING INFORMATION (OPTIONAL)
This column is for facilities that may wish to report hazardous chemicals below the reporting thresholds and/or to report any additional state or local requirements. Check the appropriate box and follow the same procedures as described above for reporting each hazardous chemical or for any mixture that contains a hazardous chemical.
