## Weather Outlook

*Widespread showers today as Idaho sits under the influence of an upper level low. Lower valleys will see rain with our higher elevations, especially through the central Idaho Mountains, seeing heavy snow. Isolated thunderstorms will form in western and central Idaho along a cold front this afternoon and early evening. Showers begin to dissipate tonight with lingering showers for mountain areas. Southern Idaho will see some periods of dry weather Thursday with northern Idaho remaining showery with snowfall expected for their higher elevations. Much drier conditions move in Friday with only the northern most tier of the Idaho panhandle expected to see some isolated shower activity through the weekend. Another system begins to press inland for the start of next week with shower activity increasing by Monday morning for the northern portion of Idaho and slowly drifting southward as the week progresses. The 8 to 14 day outlook is indicating wetter than usual conditions with near normal temperatures.*
